

ARMS NCIC

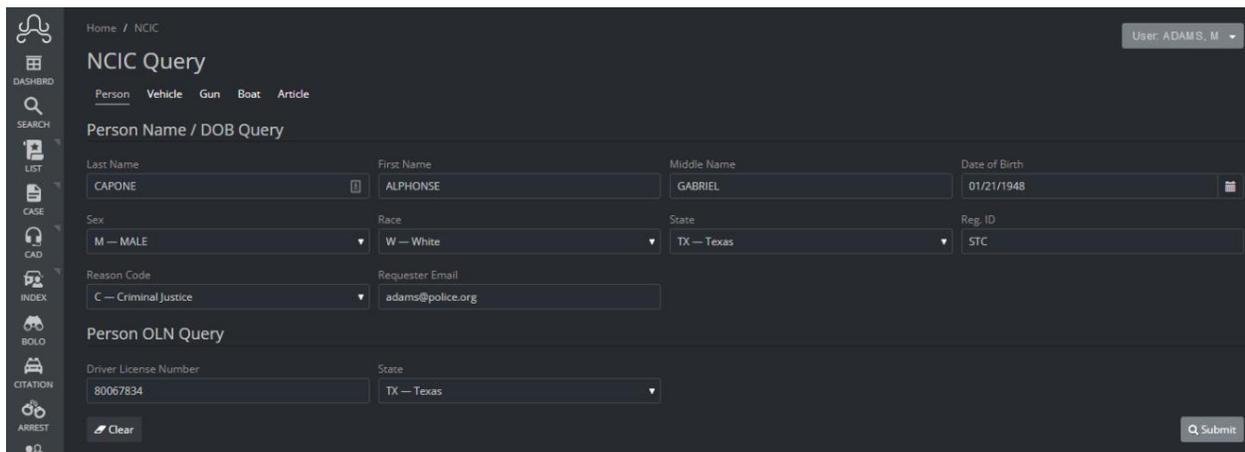

Using ARMS for DMV, NCIC, and NLETS inquiries

Capabilities

- DMV, NCIC, and NLETS inquiries
- Driver Registration, Driver History, and Wanted Person inquiries

- Vehicle Registration and Stolen Vehicle inquiries
- Gun inquiry
- Boat inquiry
- Article inquiry

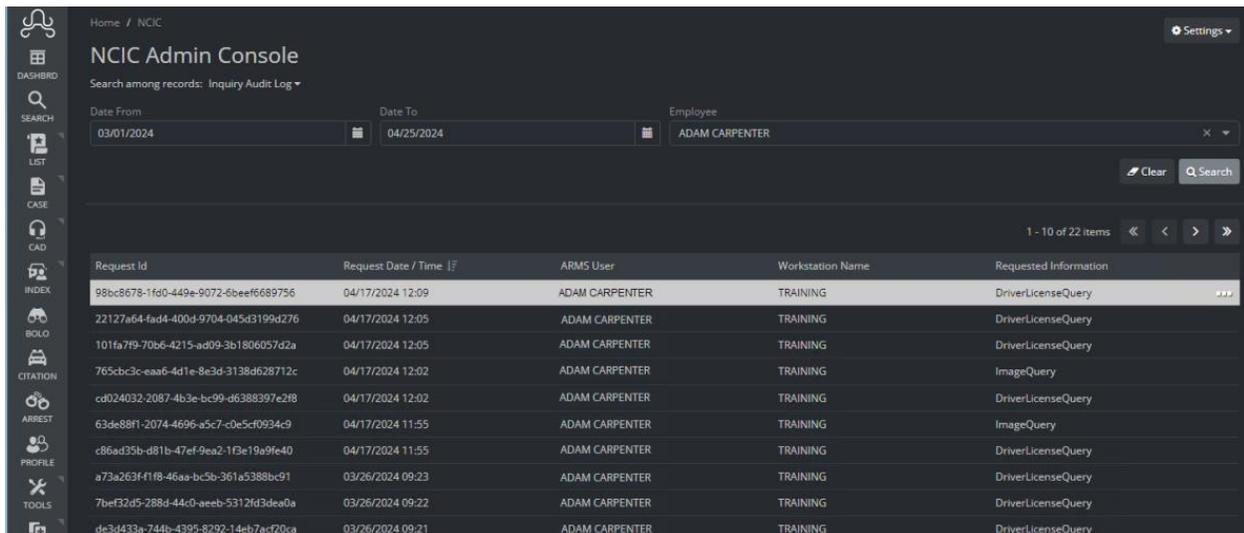

Capabilities

- Inquiry Responses
- Listed with the most recent response at the top of the list
- Groups multiple responses together based on their related initial inquiry
- Responses are visible in the list for 12 hours from receipt of the response
- Responses follow the originating user from computer to computer

Capabilities

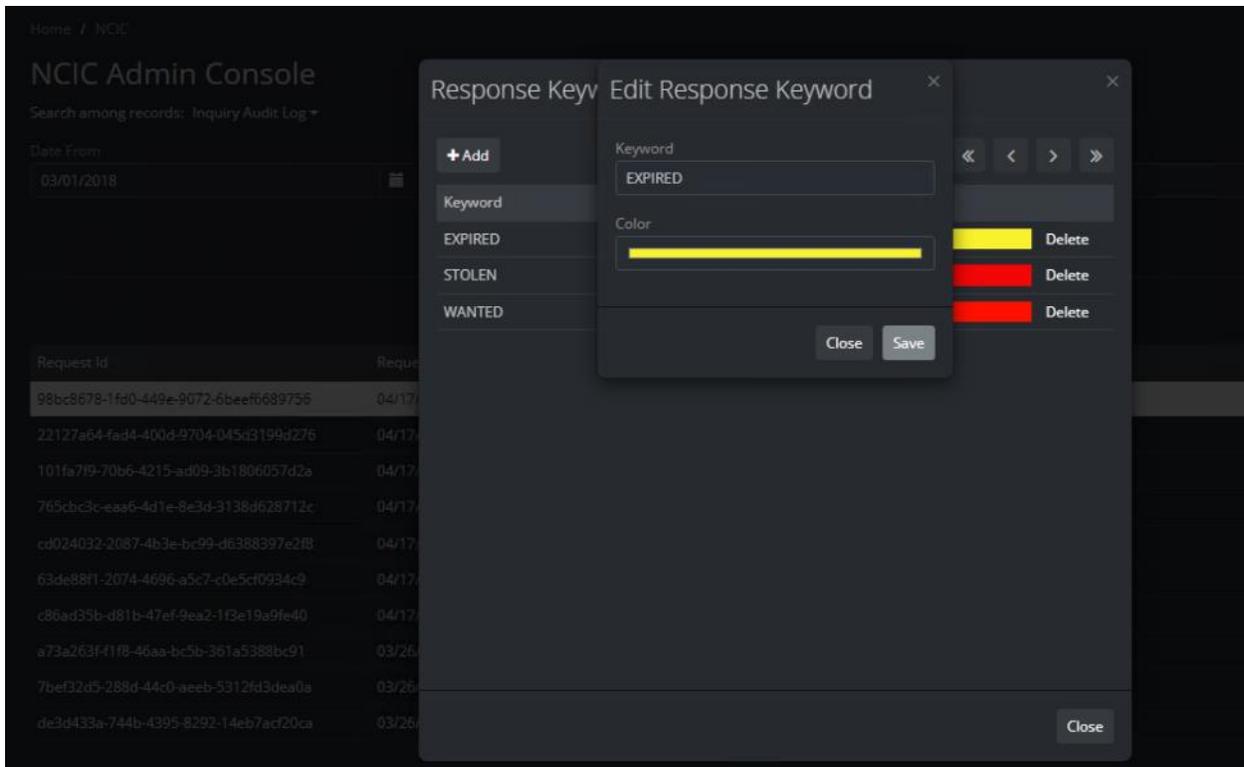

•Admin Console

The screenshot displays the NCIC Admin Console interface. At the top, it shows the breadcrumb 'Home / NCIC' and the title 'NCIC Admin Console'. Below the title is a search bar with the text 'Search among records: Inquiry Audit Log'. The search criteria are set to 'Date From: 03/01/2024', 'Date To: 04/25/2024', and 'Employee: ADAM CARPENTER'. A 'Clear' button and a 'Search' button are visible. Below the search bar is a table with 10 columns: 'Request Id', 'Request Date / Time', 'ARMS User', 'Workstation Name', and 'Requested Information'. The table contains 10 rows of data, with the first row highlighted. The 'Requested Information' column has a three-dot menu icon next to each entry.

Request Id	Request Date / Time	ARMS User	Workstation Name	Requested Information

- Review of all inquiries and responses
- Details include
- Originating user
- Identity of the inquiring device
- Date/Time of the inquiry and responses
- Inquiry search criteria
- Contents of each response
- Create list of keywords to use to paint the list row a certain color

- Helps identify listed responses containing specific words, i.e. “wanted”, “missing”, etc.

Capabilities

- Add Names
- Increased efficiency for adding Involved Parties to CAD/Case records
- Use a Driver License # to search the Master Name File

- Extend that same DL# search to the DMV, NCIC, and NLETS

- Response data leveraged to create Involved Parties record

Benefits

- Extends basic NCIC inquiry tools out to Patrol Officers
- 80% of patrol-initiated inquiries are for Driver/Vehicle Registration purposes
- Removes need for VPN connection to 3rdparty Mobile NCIC systems
- Eliminates unnecessary IT maintenance on patrol systems
- Reduces workload on Dispatchers
- Majority of NCIC inquiries shift from Dispatcher to the Patrol Officer
